Attention: Village of Tijeras Homeowners hooking up to the Village domestic water system and disconnecting well from domestic use.

Homeowners may take a plumbing test, and do the work for the domestic water distribution in the house and the domestic water yard line.

Homeowner tests are given Mondays at 8:30am in our office located at 111 Union Square SE

Water yard line test - water yard line for piping from the house to the property line. The plumbing codebook used for the plumbing tests is the International Plumbing and Mechanical Officials (IAPMO) 2012 Uniform Plumbing Code. The test has 9 questions and the cost is \$10.00. Permit fee separate from test fee. The permit fee is \$30.50 at this time.

The County does not supply codebooks, and **NO CLASSES** are given for plumbing homeowner tests. You are welcome to bring reference materials for the test.

There is no permit required to dig the trench. The permit is required for the water piping to be installed.

Thermal expansion is required on the water lines due to a check valve on or at the meter set.

East mountain depth bury is 36" minimum to 48" being the preferred depth.
Minimum ¾" pipe size for yard line.

The well must be completely disconnected from the house water supply piping.

A Pressure reducing valve is required if pressure is greater than 80 psi.

A Service shut off valve is required on the water service it is recommended to be as close to the owner's portion of the system as possible. It would be best if it is next to the meter box located inside the owner's property.

Water yard line inspection without connections waiting for a meter will be issued a **WHITE** tag. Once the water meter and all connections, including the well disconnect are completed. A final inspection will be required and the **GREEN** tag will be issued if the inspection passes.

For more information, call area inspectors Dennis Dubois 991-0375, Carl Milhollin 991-0361 or Dawn Raia 991-0370.
