## Garbage Can Placement

## Where and How To Place Your Garbage Can During Winter and Summer

**Please do not place garbage cans in the street. We realize this cleared area is an enticing location to place your garbage can, but it creates a hazard as they could get hit by vehicles or taken away by snowplows.**

**When you dig out your driveway, be sure to dig out a spot for your garbage can.**

**It is recommended that garbage cans be placed at least 3 to 5 feet off the edge of the roadway, into your driveway, so that they are out of the way of the snowplows, and or other vehicles.**

**Heavy snow accumulations, ice roads, and poor visibility during winter maintenance activities can make it difficult for snowplows to avoid garbage cans placed along side the road.**

**If you put your trash can on the opposite side of road please make sure it is 3 to 5 feet off road way and dig out a spot for your garbage can.**

**Our garbage service vehicles are equipped with a hydraulic extending arm that can grasp garbage cans.**
