Narrative:

Describe the ways the proposed project supports Albemarle County's affordable housing need

This project seeks to deliver up to 600 residential units of which 20% (120 units) shall be designated as affordable housing. The applicants proffer statement proposes a mix of housing affordability, specifically:

- 10% proposed at 80% AMI
- 10% proposed at 60% AMI

While this would meet the 20% affordability requirement, the County's post-2024 practices and standards anticipate housing affordability targeting as follows: **rental units at 60% AMI for a minimum of 30 years** and **for-sale units at 80% AMI for a minimum of 40 years**. The applicant's proposed split does not align with this preferred structure; however, the Office of Housing has indicated in prior rezoning reviews and at interdivisional meetings that variations may be considered with adequate discussion and review. Therefore, staff would be open to further insight into the applicant's proposed affordability distribution.

That said, upon further review of the applicants proffer statement, staff recommends a few updates and language changes to ensure consistency with Housing Albemarle requirements and standards.

For-sale ADU's (Section 4.1): The existing language does not reflect the County's adopted policy. Per Housing Albemarle, for-sale units must (1) serve households earning no more than 80% AMI, (2) have a maximum sales price equal to or less than **65% of the HUD HOME one-unit purchase price limit**, and (3) an affordability period of 40 years.

For-rent ADU's (Section 4.2): The existing language refers to **net rent**, which is language that the County has moved away from under the updated housing policy. Per Housing Albemarle, for-rent ADU's **shall adhere to the maximum rent amounts established annually by the Albemarle County Office of Housing. Maximum rents for Affordable Dwelling Rental Units are calculated by multiplying factors per unit size provided in Housing Albemarle or subsequently adopted housing policy document for Albemarle County.** Lastly, the required affordability period for rental units is 30 years.

Overall, staff recommend that the applicant update the proffer statement as prescribed above to better conform with the adopted Housing Albemarle practices and standards. Ultimately, the proposed project would make a positive impact on the County's housing goals and move it closer to its affordable housing units goal for this year.

Project Evaluation:

- This project positively impacts affordable housing needs in Albemarle County
- This project positively impacts workforce housing needs in Albemarle County
- This project has no impact on affordable or workforce housing needs in Albemarle County
- This project has a negative impact on the affordable or workforce housing stock in Albemarle County
